

## Christine Roman Lantzy, PhD

Christine Roman Lantzy has Bachelor's Degrees in Elementary Education, and Visual Impairment. She is a Certified Orientation & Mobility Specialist and has a Master's Degree in Medically Fragile, High Risk Infants. Her Ph.D. focused on Cortical Visual Impairment and Infancy.

Christine Roman Lantzy is The Director of Pediatric View in Pittsburgh Pennsylvania. She was the first CVI Project Leader for The American Printing House for the Blind. Christine provides workshops and consultations through CVI Resources and has had the honor to be invited to all parts of The United States and many countries outside The U.S. She is the author of *Cortical Visual Impairment: An Approach to Assessment and Intervention (2007, 2018)* which won The Bledsoe Award in 2008, and *Cortical Visual Impairment: Advanced Principles (2019)*. She taught at The University of Pittsburgh and Marshall University Graduate College for a total of 17 years.

Roman Lantzy is the mother of two grown children who are a constant reminder of her most important role. As a mother, Christine has developed insight into the motivations of parents of children with CVI with whom she shares a common goal. That goal is to see their children have a rich and fulfilling life.
